

June 6, 2018

Chairman Tedder and members of the House Committee on Tax Policy:

We are a group of Michigan-based companies with deep roots in our great State. Together, we have hundreds of facilities and thousands of employees, customers and vendors, all who proudly call Michigan home. We are interested and supportive of many ongoing efforts by private sector and government stakeholders to improve Michigan's ability to compete and prosper, including this effort to ensure accurate, uniform and equitable tax administration for all Michigan property owners and citizens.

As a result, we wish to express our support for HB 6049. HB 6049's objective is to reform Michigan's property tax administration process by specifying minimum quality standards that every city, township, and county assessing office must meet. This is a common sense proposal to achieve more accurate, uniform and equitable administration of Michigan's largest and most administratively segmented tax, the property tax.

We look forward to continued dialogue and participation in this important effort to implement the reforms and improvements contained in HB 6049.

Thank you,
